SUB: Proposal Letter for E Waste disposal

Dear Ma'am/ Sir,

Hulladek Recycling is Eastern India's authorized electronic Waste Management Organization. **E-waste**, as it is popularly known, includes the broad spectrum of electronic appliances, products, components, and accessories that due to malfunction, exhaustion or obsolescence have been discarded. Currently, most e-waste and dry waste recycling activities are undertaken by the unorganized sector and their unethical methods severely disturb the ecological balance and is a cause of environmental and social problems including health hazards as well.

During unorganized treatment and land filling these pollutants find their way to the soil, water, and air. In addition, the country loses out on resource recovery, as unorganized sector can **recover only 25%** of the material resources against possible efficiencies of over **95-99% in organized sector units**. These issues are increasing by the hour and awareness on the same is imperative.

As a part of the organised sector, it is our vision to discard hazardous waste in proper manner and ensure its safe disposal. In addition to appropriate disposal measures, we provide certificates to the organisation recognising their contribution in this initiative.

National Assessment & Accreditation Council (NAAC) has mentioned about Waste Management Practices (including Solid, Liquid & E-wastes) in the sub-criterion 7.15 under criterion 7 assigned for "Institutional Values and Best Practices". As per this criterion, the accreditation grade of any educational institute depends on how the waste generated is managed by the concerned authority of the institution. The documents provided will be of significant use to consider for NAAC for your esteemed institution.

We look forward to your favourable response and assure you of prompt services with regards to ethical E Waste disposal.
